### **Adams Remco Shares How Artificial Intelligence (AI) Will Impact Small to Mid-Sized Businesses**

#### *Leading Managed Technology Services Provider Reports on Increases in AI Prevalence*

South Bend, IN – October 28, 2025 - Adams Remco a leading managed technology services provider (MTSP), reported today on the state of artificial intelligence (AI) and how current applications are impacting businesses and the technology that powers those businesses. While AI is still in its early stages, global demand has increased drastically. In fact, Statista projects that there will be “8 billion voice assistants by 2023” and according to the IDC, “75% of commercial enterprise apps will use AI by 2021.” As AI continues to expand into ubiquity, small to mid-sized businesses will need to adjust how they operate to take advantage of AI ahead of their competition.

While most businesses are primarily attracted to AI and machine learning in order to improve operational efficiencies, expand research and development capabilities and to streamline customer experience, this is only the tip of the iceberg. “AI is reaching an inflection point and we’ve been paying close attention,” stated Dean Carlile, President & CEO of Adams Remco. “AI and machine learning are revolutionizing how we interact with technology and as a society, we’re just beginning to understand its potential on an SMB’s profitability.”

A great example of AI is in the area of cybersecurity, which is designed to protect an SMB’s computer network. AI is being applied to strengthen data safeguards and

prevent identity theft. One such application of AI, is to not only verify a password, but to monitor the keystroke rhythm with which the user types in the password. As a result, AI applications will be able to recognize whether the user logging-in is typing the password in the same way they normally do it. AI will determine if it’s an identified user or a potential hacker. Cybersecurity AI-based applications will further help fortify SMBs facing an attempted infiltration.

Furthermore, AI has also become more sophisticated in its ability to read, track, utilize and even redact data in surveillance technology. AI apps provide authorities with instantaneous intelligent access to audio, image and video content. Surveillance cameras can now perform instantaneous facial recognition, at scale. This puts an extreme level of power into the hands of SMBs to protect customers and employees as well as educational institutions and their students.

Another context is how AI is revolutionizing customer service and support. For example, what if an inbound customer support message could trigger an instantaneous data grab from each customer’s social media profiles, read their recent posts and summarize those insights into relevant suggestions? These types of applications are emerging and will inevitably lead to more effective interactions, which will replace customer associations of unhelpful robochat solutions.

“Adams Remco is staying at the forefront of AI in order to help our customers evolve their businesses,

increase their profitability and enhance productivity,” added Carlile.

#### **ABOUT ADAMS REMCO**

Adams Remco, Inc., a leading provider of business technology solutions, has been a trusted partner to organizations across Indiana, Michigan, and Florida for decades. Beginning in 1945, the family-owned company has grown from its roots in office equipment sales and service to a multifaceted technology solutions provider headquartered in South Bend, Indiana.

Today, Adams Remco delivers a comprehensive suite of offerings designed to streamline operations and enhance productivity for businesses of all sizes. Its portfolio includes innovative office technologies, managed IT services, workflow automation, production print, electronic document management, signage for offices outdoor or digital, and managed print services, supported by factory-trained service technicians committed to exceptional customer care.

Throughout its long history, Adams Remco has earned a reputation for innovation, reliability, and customer-focused solutions. Its continued investment in advanced technologies and its dedication to high-quality service have positioned the company as a leader in the business technology sector, helping organizations modernize their operations and achieve long-term success.
